## 15. Remarks

This application to change Permit 2010, Certificate 13617 is to be co-mingled with applications to change Proofs 01275 and 01276 and to Permits 2579 and 4048 and also to a new appropriation from Red Mountain Creek.

The waters originally appropriated under Permit 2010 were identified as being from the Middle Fork of Cottonwood Creek. This was the historical identification of this stream.

Based on field investigations performed in 1999, it appears that the source of this water is actually from an unnamed tributary to Wagon Tire Creek, which itself is a tributary of Cottonwood Creek.

Water has been historically conveyed from the source via Cottonwood Creek and then diverted through a series of ditches and reservoirs for use within the place of use.

Use the map on file under Permit 2010 for the existing point of diversion and place of use.

The total land area to be irrigated by this application and applications 65936, 65937 and 65939 through 65941 shall not exceed 2000 acres from all sources.
